Art Unit: 3727

Claims 4, 9-26 and 30-38 are canceled. Claims 1-3, 5-8 and 27-29 are pending.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 27-29, drawn to a method of improving and making a carrier, classified in class 29, subclass 428.
- II. Claims 1-3 and 5-8, drawn to a sealable wafer carrier, classified in class 220, subclass 62.22.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by a different process wherein the door and the exterior surface of the door are the same and are not made by an overlaying process. For example, the door is two layers, one layer making the exterior surface while the other layer makes wafer cushion portion.

Therefore, the exterior surface is not overlaid.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Douglas Christensen on October 25, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3727

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
